Dear

Carisbrook Primary School has a long-enriched history in the Energy Breakthrough and students at our school thoroughly look forward to being a part of the senior unit to represent the school. We are excited to announce that we will be participating in the EBT held in Maryborough from 19th to 23rd of November.

At CPS, the EBT is an exciting opportunity for our 5/6 students to participate in unique challenges with real-world skills. As we are one of the oldest competing schools in EBT, our senior students try their best to achieve their goals. Energy Breakthrough also gives our students a chance to form long-lasting friendships because of the amount of teamwork involved in the program. We can only achieve those friendships if we have businesses to sponsor our entries for trikes, robotics, and push carts.

With a high level of interest and investment from our school, we are making the Energy Breakthrough more than just one weekend. At Carisbrook, the HPV teams are looking to compete in more races before our event in Maryborough. In addition to robotics, which is a global phenomenon, our school is planning to compete in other events held in the USA and submit our coding skills via a live video feed. Both aspects are brand new to our school, where our staff and students are excited about taking the program to the next level.

This sponsorship would help us in many ways. We would be tremendously grateful if you would help our teams excel in the 2026 Energy Breakthrough by sponsoring us.

For our teams to participate and experience this event to its full potential, there are many costs involved, and we rely on the generosity of our community and local businesses to ensure this is made possible for our school. We also have Robotics and Pushcart teams that need supplies and support to compete in the designated events.
